- 19.3 Air-Conditioning System
: Single/ Multi-split wall mounted fan coil unit air-conditioning system to Living/Dining, Bedrooms and Study.

- 19.4 Water Heater
: Hot water provision to all Bathrooms & kitchen.

Note:

1. Materials, Fittings, Equipment, Finishes, Installation and Appliances
Subject to clause 14.3, the brand, colour and model of all materials, fittings, equipment, finishes, installations and appliances supplied shall be provided subject to Architect's selection, market availability and the sole discretion of the Vendor.

2. Air-conditioning System
To ensure good working condition of the air-conditioning system, the system has to be maintained and cleaned by the Purchaser on a regular basis. This includes the cleaning of filters, clearing the condensate pipes and charging of gas, etc. The Purchaser is advised to engage his/her own contractor to service the air-conditioning system regularly.

3. Cable Television and/or Internet Access
The Purchaser is liable to pay annual fee, subscription fee and such other fees and equipment cost to the Cable TV and/or internet service providers (ISP) or any other relevant parties or other relevant authorities. The Vendor is not responsible to make arrangement with any of the said parties for the service connection for their respective subscription channels and/or internet access.

4. Position and Provision of Power points, Switches, Telephone Points and SCV outlets and other items
The position and provision of all power points, switches, Telephone Points and SCV outlets and other items listed in the Electrical Schedule are indicative and for illustration purposes only and subject to our Consultants' design.

5. Wardrobes, Kitchen Cabinets, Fan Coil Units and Door Swing Positions
Layout/locations of wardrobes, kitchen cabinets, fan coil units and door swing position are subject to Consultants' sole discretion and final design.

6. Timber Flooring
Timber strips are natural materials containing veins and tonal differences. Thus, it is not possible to achieve total consistency of colour and grain in their selection and installation. Timber strips are also subject to thermal expansion and contraction beyond the control of builder and vendor. Natural timber that is used outdoors will become bleached due to sunlight and rain. Thus, the cycle of maintenance on staining will need to be increased as required. Notwithstanding this note, the Vendor shall remain fully responsible for the performance of its obligations under Sale and Purchase Agreement clause 9 and clause 17.

7. Tiles
Selected tile sizes and tile surface flatness cannot be perfect and subject to acceptable range described in relevant and accepted industrial standards.

8. Marble and Granite
Marble and granite are natural stone materials containing veins with tonality differences. There will be colour and markings caused by their complex mineral composition and incorporated impurities. While such materials can be pre-selected before installation, this non-conformity in the marble or granite as well as non-uniformity between pieces cannot be totally avoided. Granite tiles are pre-polished before laying and care has been taken for

their installation. However, granite, being a much harder material than marble, cannot be re-polished after installation. Hence, some differences may be felt at the joints. Subject to Sale and Purchase Agreement clause 14.3, the tonality and pattern of the marble, limestone or granite selected and installed shall be subject to availability.

9. False Ceiling
The space provision allows for the optimal function and installation of M&E services. Access panels are allocated for ease of maintenance access to concealed M&E equipment. Ceiling works would be required if removal of the M&E equipment is needed. The layout and location of false ceilings and access panels are subject to Consultants' sole discretion and final design.

10. Recreation Facilities
All recreation facilities supplied shall be provided subject to Consultants' selection, market availability and the sole discretion of the Vendor.

11. Warranties
Where warranties are given by the manufacturers and/or contractors and/or supplier of any of the equipment and/or appliances installed by the Vendor at the Unit, the Vendor shall assign to the Purchaser such warranties at the time when possession of the Unit is delivered to the Purchaser. Notwithstanding this assignment, the vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.

12. Glass
Glass is manufactured material that is not 100% pure. Invisible nickel sulphide impurities may cause spontaneous glass breakage, which may occur in all glass by all manufacturers. The Purchaser is recommended to take up home insurance covering glass breakage to cover this possible event. Notwithstanding this note, the Vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.

13. Swimming Pool
Private swimming pool filtration system has to be maintained and cleaned on a regular basis by purchasers at purchaser's own cost to ensure good working condition of the system and good water quality.

14. Mechanical Ventilation System
To ensure good working condition of the mechanical ventilation system, the mechanical ventilation system for the exhaust system within internal toilets and kitchen (where applicable) is to be maintained by the Purchaser on a regular basis.

15. Fully Automated Mechanical Car Parking System
 1. Developer has taken necessary measures to maintain comfortable noise level as regulated by authority.
 2. It is car owner's responsibility to ensure that no people is inside the car when it is being transferred.

AIRCON ISOLATOR: BASED ON THE NUMBER OF CONDENSING UNIT

3. It is owner's liability if they fail to follow the operational instruction thereby causing damage to their and/ or other car.
4. Management shall not be responsible for damage cause by limitation of the mechanism.
5. Time lapse may occur during the retrieval of car operated on standby generator set.
6. In the case of system failure, remaining cars will be kept stationed on the rack.
7. The mechanical car parking is designed for max car size (2150mm width, 5200mm length, 2100mm height) and 2600kg weight.

DESCRIPTION OF COMMON PROPERTY
Common Facilities: seating area is to hold as common property as defined in the Building Maintenance and Strata Management Act 2004 and the Land Title (Strata) Act, Cap 158.

PURPOSE OF BUILDING PROJECT AND RESTRICTION AS TO USE

1. The building project is strictly for residential occupation only.
2. The uncovered Private Enclosed Space (PES), open to sky void area over courtyard and open roof terraces are not to be enclosed or roof over.
3. No structure or other uses are allowed on the roof top unless otherwise approved by the competent authority.
4. No openings are allowed along common party walls except as approved in the Planning Permission.
5. No access to R.C. flat roof except for maintenance only.
6. No access to Air-conditioning Ledge at Roof except for maintenance only.
7. All reinforced concrete ledges shall not be converted to any other uses (e.g. air conditioning condenser ledges) without prior planning approval.
8. The private car parking lots approved as part of the strata units contiguous to these shall not be converted to any other uses.
9. The tree planting strips shall remain as part of the communal open space and cannot be fenced up and/or included in the strata boundaries.
