(i) Marble, Limestone and Granite  
Marble, limestone and granite are natural stone materials containing veins with tonality differences. There will be colour and markings caused by their complex mineral composition and incorporated impurities. While such materials can be pre-selected before installation, this non-conformity in the marble, limestone or granite as well as non-uniformity between pieces cannot be totally avoided. Granite tiles are pre-polished before laying and care has been taken for their installation. However granite, being a much harder material than marble cannot be re-polished after installation. Hence some differences may be felt at the joints. "Subject to Clause 14.3, the tonality and pattern of marble, limestone or granite selected and installed shall be subjected to availability".  
(ii) Timber  
Timber is a natural material containing grain/vein and tonal differences. Thus it is not possible to achieve total consistency of colour and grain in its selection and installation.  
(iii) Cable Television and/or Internet Access  
The Purchaser is liable to pay annual fee, subscription fee and such other fees to the StarHub Cable Vision Ltd (SCV) and/or internet services providers (ISP) or any other relevant party or any other relevant authorities. The Vendor is not responsible to make arrangements with any of the said parties for the service connection for their respective subscription channels and/or internet access.  
(iv) Fitting, Equipment Finishes, Installations and Appliances  
Subject to Clause 14.3, the brand, colour and model of all materials, fittings, equipment finishes, installations and appliances supplied shall be provided subject to Architect's selection, market availabilities and the sole discretion of the Vendor.  
(v) Wardrobes, Kitchen Cabinets, Fan Coil Units and Electrical Points, Door Swing Positions and Plaster Ceiling Board  
Layout/Location of wardrobes, kitchen cabinets, fan coil units, electrical points, door swing positions and plaster ceiling boards are subject to Architect's sole discretion and final design.  
(vi) Air-Conditioning System  
To ensure good working condition of the air-conditioning system, the system has to be maintained and cleaned by the Purchaser on a regular basis. This includes the cleaning of filters, clearing the condensate pipes and charging of gas.
